Projects

Several.com - *SeveralBrands, 2021*

Several.com is a comparison platform that aims to review and examine certain products and services to educate our readers and give them a clear and sharp insight before making any purchase,
Built using a Drupal 8 content management system with many custom modules and components to meet the business requirements, it creates comparison pages between the vendors and products. It makes it translatable for more than 9 languages.

IASLC - *Vardot, 2020*   [Case study]

The International Society for the Study of Lung Cancer (IASLC) is a global organization dedicated to improving lung cancer research, education, and patient care.

DrupalAudit - *Vardot, 2020*

DrupalAudit is a platform to help measure and analyze Drupal website performance. We created using Drupal 8 as a website container and have a react app to display the reports from custom APIs we created using Nodejs as an external service.

ICARDA - *Vardot, 2019*   [Case study]

ICARDA is an international organization undertaking research for development. We create a Drupal 8 site with a lot of integration with external services to import their content using (APIs) and migrate the old site content to the new site using (Drupal 8 migration) with custom code.

Revton, *2019*

Revton platform is a service company that enables leading brands to acquire and reach their customers directly, we create a simple Drupal 8 site in two languages enhance the user experience with new UI, and make a lot of SEO enhancements.
